Signs, Billboards, outdoor Advertising structures, or advertising of any kind as defined in Title 23 United States Code, Section 131, shall not be erected, displayed, placed or maintained upon or within this tract, EXCEPT signs to advertise the sale, hire or lease of this tract or the principal activities conducted on this land.

The grantor reserves rights to use the abutting state property for highway purposes and excludes from this grant any rights to air, light, view and visibility over and across the abutting state property. The Grantee is hereby advised that due to present or future construction on the adjacent highway including but not limited to excavation, embankment, structures, poles, signs, walls, fences and all other activities related to highway construction or which may be permitted within the Highway Right of Way that air, light, view and visibility may be restricted or obstructed on the above property.

Together with and subject to an existing access. The Department considers access control rights an asset that is purchased and can be sold. Any approved changes to limited-access or no-access lines requires reimbursement to the Department of its fair market value. If the access opening is approved and is to serve private property, the property owner shall pay the Department for property appreciation, resulting from the Department's relinquishment of the access. The appreciation of the private property involved shall be determined by an independent licensed appraiser as listed within the Department's certified pool of approved appraisers. The property appraisal must show the property valuation before the access is created or modified (the before condition) and after the access is created or modified (the after condition). The difference in the appraised property valuation in the before condition, when compared with the appraised property valuation in the after condition, determines the current fair market value for the access, which shall be the price of the access. Because appraised access valuation costs are a major consideration for any development-related initiative, it is considered a best practice for the applicant to obtain the appraisal at the beginning of the grant of access application process. Upon approval to modify a limited-access line or no-access line, the applicant must pay the fair market value of the access right acquired from the Department. The property owner shall also pay all costs for construction of gates, approaches and any other incidental construction costs involved.
