NOTES TO WATER RIGHTS ADDENDUM TO LAND DEEDS

Please read the following notes carefully in order to avoid problems and the possible loss of the water rights being conveyed in connection with this transaction.

The mere purchase of a water right does not guarantee: (1) that the water right is in good standing with the Utah Division of Water Rights; (2) that the owner has clear title to the water right; (3) that the Division will recognize the ownership change; or (4) that the Division will approve any proposed changes or extensions regarding the water right. You are encouraged to conduct proper "due diligence" research into any water right before purchasing it.

- N1 Once this Water Rights Addendum has been recorded at the County Recorder's Office, Grantee must prepare a "Report of Water Right Conveyance" or "ROC" (available from the Utah Division of Water Rights) and file it with the Utah Division of Water Rights in order to: (1) have the Division's records updated with current ownership and address information; (2) file any application on these water rights; and (3) receive notifications concerning deadlines and other essential information pertaining to these rights. **Failure to do so PROMPTLY may result in the loss of these water rights.** Help with reviewing the water rights and completing the ROC can be obtained from the Utah Division of Water Rights and/or water professionals, such as attorneys, engineers, surveyors, and title professionals with experience in water rights and water law.
- N2 A water right often has one or more applications on file with the Utah Division of Water Rights that affect that water right, such as change applications, extension requests, and non-use applications. These applications should be transferred with the water right. The Grantee should review the water right applications and other documents on file with the Utah Division of Water Rights.
- N3 Water rights owned by the Grantor and used on Grantor's Parcel may be "appurtenant" to Grantor's Parcel. Not all appurtenant water rights have been assigned a water right number because not all water rights are "of record." If Section A is being completed, this conveyance includes all appurtenant water rights, whether or not they are listed by water right number or are of record. Grantee should investigate each water right listed and determine if there are any water rights that are not of record. If there are water rights not of record, Grantee should seriously consider making them of record by filing the appropriate forms with the Utah Division of Water Rights.
- N4 100% of the water rights listed here are being conveyed to Grantee. A Report of Water Right Conveyance (see N1 above) should be filed on each water right listed here. The Water Rights listed in Section B may not provide sufficient water for all of the historic water uses.
- N5 Less than 100% of the water right listed is being conveyed to Grantee. The exact portion to be conveyed, expressed in terms of the beneficial uses associated with this portion of the water right must be described. This description generally consists of: (1) the number of families for domestic (indoor culinary) uses (generally quantified as 0.45 acre-feet per family for a year-round residence and 0.25 acre-feet per family for a seasonal residence); (2) the number of acres irrigated (this involves issues of "irrigation duty" [the number of acre-feet of water allowed per acre of irrigated land] and "sole supply/supplemental supply" [the amount of water allocated to each water right when more than one right is used on the same land or for the same livestock]; and (3) the number of livestock being watered (expressed in terms of equivalent livestock units or "ECUS" which are quantified at the rate of 0.028 acre-feet per EAU for full-year use. Any other uses being conveyed should be similarly described. Help with evaluating, quantifying, and/or describing the uses can be obtained from the Utah Division of Water Rights and/or water professionals.
- N6 Shares of stock in water companies (including irrigation, canal, and ditch companies) are generally not transferred by deed. Each company has procedures for transferring ownership. The company should be contacted to ascertain the appropriate procedures to follow. The most common procedure is for the Grantor to endorse and deliver the stock certificate to the Grantee, who then presents that certificate to the company for issuance of a new certificate in the Grantee's name. If another procedure is to be followed, that should be noted on the "Other water related disclosures" line in Section C of this form. Each company also defines how much water is associated with a particular share and what fees and assessments are charged. The Grantee should contact the company about all such issues.
- N7 If culinary water service is currently being provided to the Grantor's Parcel by a municipality, a water district, or a water company, that entity should be listed here and the Grantee should contact that entity to ascertain what is required to continue receiving such service.
- N8 If outdoor/secondary/irrigation water service is currently being provided to the Grantor's Parcel by a municipality, a water district, or a water company, that entity should be listed here and the Grantee should contact that entity to ascertain what is required to continue receiving such service.
- N9 If this box is checked, the Grantee should investigate what water IF ANY is available for use on the Grantor's Parcel.
- N10 This space should be used for any other information that the Grantor has which is relevant to water issues associated with the Grantor's Parcel.
