SINGLE-PARCEL DRAINAGE AGREEMENT
Between
UTAH DEPARTMENT OF TRANSPORTATION
And
Silverado Group LLC

E# 3335211 PG 1 OF 11

LEANN H KILTS, WEBER CTY. RECORDER
 05-AUG-24 248 PM FEE \$40.00 SED
 REC FOR: UTAH DEPT. OF TRANSPORTATION

County Tax ID No. 130720072

This Single-Parcel Drainage Agreement ("Agreement"), by and between Utah Department of Transportation ("Department") and Silverado Group LLC ("Permittee") describes the terms and conditions of offsite drainage connections in the Department Right of Way.

RECITALS

WHEREAS, the Permittee owns the property described in Exhibits; and

WHEREAS, the Permittee, its successors and assigns, desires to construct drainage facilities in accordance with the plans permitted by the Department, to collect and convey stormwater from their property and discharge into the Department's drainage facilities, more particularly shown in Exhibits; and

WHEREAS, the Permittee shall be responsible to comply with the required stormwater permits, applicable laws and regulations.

AGREEMENT

The Parties agree to the following:

(1) DRAINAGE CONNECTION IMPACT

- a) The Department may perform inspection of Permittee's drainage facility to monitor compliance with the Permit and with state and federal statutes, regulations, and rules. Permittee grants the Department access to the Permittee's property for inspection or to perform any repairs to prevent damage to the Department's Right of Way. The Department's inspection does not relieve the Permittee of its responsibilities. The Permittee is responsible for the Department's inspection costs.
- b) Permittee shall comply with applicable stormwater permits, laws, regulations, and rules.
- c) The Permittee is responsible for repairing and restoring any portion of the Department Right of Way and drainage features located therein that may be damaged as a result of making the drainage connection or as the result of any subsequent drainage originating from the Permittee's property. A bonded contractor must apply for the required permit to install drainage facilities in the Department Right of Way prior to the commencement of any such work.
- d) The Permittee must not increase the stormwater discharge into the Department's drainage facilities without the written permission of the Department.
- e) The Permittee is responsible for all liability resulting from the discharge of pollutants into the Department's drainage facility from its property or drainage facility, including the failure to comply with applicable stormwater permits, laws, regulations and rules.

- f) The Permittee accepts all risks associated with the connection to the Department's drainage facility.

(2) LONG TERM OPERATION AND MAINTENANCE

- a) The Permittee's drainage facilities shall be maintained and operational to prevent or reduce the discharge of pollutants.
- b) The Department may notify the Permittee of any maintenance requirements if the Permittee fails to maintain the drainage facilities. The Department reserves the right, without relieving the Permittee of its obligations, to reconstruct or make repairs to the drainage connection as necessary. The Permittee must reimburse the Department for its cost if the Permittee fails to comply with the Department's written notification.
- c) The Permittee's drainage facilities shall be maintained without access from any interstate highway or ramp.

(3) FUTURE IMPACTS

- a) The Department has the right to change its drainage facilities for any future transportation project. If the Department's drainage facilities are reconstructed or modified, the Department reserves the right to hold the Permittee responsible for the cost to reconnect to the Department's drainage facilities. The Department is not responsible for any costs the Permittee incurs due to the drainage facilities being reconstructed or modified.

(4) LIABILITY

- a) Pursuant to R930-7-6(2)(b), the Permittee is required to guarantee satisfactory performance under this Permit.
- b) The Department may proceed against Permittee to recover all expenses incurred by the Department, its employees, or contractors in repairing the sections of roadway damaged by the Permittee or its drainage facility, including the failure to restore the Right of Way to Department standards.
- c) The Permittee will be liable for all costs the Department incurs under this agreement.
- d) The Permittee waives any claims against the Department for damages resulting from any back-up or flow into the Permittee's drainage facilities or property.
- e) The Permittee will indemnify, defend, and hold harmless the Department, its employees, and the State of Utah for any and all damages, accidents, causalities, occurrences, or claims which might arise or be asserted against the Department from failure of the Permittee to comply with its obligations under this agreement relating to the drainage connection.

(5) REMOVAL OF CONNECTION

- a) Non-compliance with this Agreement may result in the Department removing the drainage

connection and restoring the highway and Right of Way at the sole expense of the Permittee.

- b) The Department will notify the Permittee in writing prior to any removal, setting forth the violations, and will provide the Permittee a reasonable time to correct the violations to the satisfaction of the Department. The Department may order the removal of any drainage connections subject to this Agreement if the violations are not corrected.

(6) SUCCESSORS AND ASSIGNS

- a) All covenants, obligations and agreements will be binding upon the parties, their successors and assigns and run with the land as described in Exhibit A until the drainage connection is removed from the Department Right of Way.

(7) MISCELLANEOUS

- a) Each party agrees to undertake and perform all further acts that are reasonably necessary to carry out the intent and purpose of the Agreement at the request of the other party.
- b) This Agreement does not create any type of agency relationship, joint venture, or partnership between the Department and Permittee.
- c) The failure of either party to insist upon strict compliance of any of the terms and conditions, or failure or delay by either party to exercise any rights or remedies provided in this Agreement, or by law, will not release either party from any obligations arising under this Agreement.
- d) This Agreement shall be deemed to be made under and shall be governed by the laws of the State of Utah in all respects. Each person signing this Agreement warrants that the person has full legal capacity, power and authority to execute this Agreement for and on behalf of the respective party and to bind such party.
- e) If any portion of this Agreement is held to be invalid or unenforceable for any reason by a court of competent jurisdiction, such invalidity or unenforceability shall not affect any other provision, and this Agreement shall be construed as if such invalid or unenforceable provision had never been included.
- f) The effective date of this Agreement is the date signed by the last party.

IN WITNESS WHEREOF, the parties hereto have caused this Drainage Agreement to be executed by its duly authorized officers.

**STORM DRAINAGE ANALYSIS
25 YEAR RETURN PERIOD - 24 HOUR STORM EVENT**

Canyon Road Townhomes
Ogden, Utah

Weber County, Utah

13-Sep-23

1. Drainage Areas:

Drainage Area #1 -	0.557 acres	Paving and Impervious Areas
Drainage Area #2 -	0.456 acres	Buidings - Roof Areas
Drainage Area #3 -	0.757 acres	Landscaping Areas
Total Area =	1.771 acres	Drainage Area - Site Detention Area

Drainage Area Slope = varies % (Per the design drawings)

Study Area Overview:

The site will be used as high-density residential

2. Coefficient of Run-off:

The coefficient of runoff "C" was developed using storm water design by "Seelye 18-01", and Mark J. Hammer from "Water and Waste Water Technology" is as follows:

Drainage Area #1 - Paving and Impervious Areas	C = 0.95
Drainage Area #2 - Buidings - Roof Areas	C = 0.90
Drainage Area #3 - Landscaping Areas	C = 0.15

Composite "C" = **C = 0.595**

C= Coefficient of run-off (based upon surface materials)

3. Time of Concentration:

Using Storm Water Run-Off - "Overland Flow Time", design by "Seelye 18-01"

T_c from Area = 30.00 minutes (from Site Plan Drawings and tables from Seelye 18-01)

4. Rainfall Intensities:

Rainfall Intensities are calculated using the rainfall frequency duration curves for Weber County, Utah. Using the NOAA rainfall intensity values for a 100 year "Return Period".

Time of Concentration (minutes) Tc	Rainfall Intensity* (in/hour) I
5	5.120
10	3.900
15	3.230
30	2.170
60	1.340
120	0.770
180	0.533
360	0.328
720	0.209
1440	0.128

*Rainfall Intensity for a **25-year** return period - 24 hour storm event.

Tc=time of concentration

I=rainfall intensity

Drainage Area

1.77 acres

Paving and Impervious Area

Tc = 30.00 minutes

Rainfall Intensity (I) = 2.12 (in/hr) (Chart above)

Calculation Parameters:

Maximum flow paths used for routing and calculating time of concentration.

Maximum Intensity on technical paper chart used for time of concentration under 5 minutes.

5. Peak Run-off:

(Pipe sizing)

Using the "Rational Formula" to calculate the Peak run-off (Q=CIA) - maximum pipe flow

Q= Quantity of run-off, in cubic feet per second (cfs)

C= Coefficient of run-off (based upon surface materials)

I= Intensity of the average storm, in inches per hour (in/hr)

A= Area of drainage area, in acres

Total Drainage Area

Coeff. of Run-off "C"	Time of Concentration "Tc"	Rainfall Intensity "I"	Rate of Run-off "Q" (cfs)
--------------------------	-------------------------------	---------------------------	------------------------------

Area 1.7705 acres Paving and Impervious Area 0.595 30.00 2.12 2.23

Total Flow = 2.23

All Areas Q = 2.23 cfs

6. Allowable Discharge:

Analysis: These flow rates are to be used as the allowable discharge from the detention basins.

Allowable Discharge:

Allowable discharge of storm water volume is 0.1 cfs per acre Per Ogden City Standards.

$$\text{Allowable discharge} = \frac{0.10 \text{ cfs/acre}}{\text{Allowable discharge}} = \frac{1.77 \text{ acres}}{0.18 \text{ cfs}} = 0.18 \text{ cfs}$$

80th percentile storm (Site Retention):

An 80th percentile storm depth of 0.61 inches was multiplied by the site area (in acres) and Rv factor to determine the required retention depth required prior to allowable discharge. This 80th percentile storm depth volume must remain on site and be discharged by percolation.

80th percentile storm (Site Retention):

Area =	77125	sf
d =	0.595	Impervious %
Rv =	0.427	Soil Group A
Rv =	0.458	Soil Group B
Rv(ave) =	0.443	A&B Soil Average
d =	0.051	in
WQV =	1735	cf.

$$1.77 \text{ acres} \times 43,560 \text{ sf.} \times 0.61/12 * Rv_{(ave)} = 1,735 \text{ ft}^3$$

7. Volume of Run-off: 25 year storm period

(Adjust the Basin-footprint into Acres)

Analysis

Time Tc minutes	Intensity I in/hour	Allowable Discharge c.f.	Volume Generated Inflow c.f.	Retention Volume Required	(Required Storage Basin)
				detention c.f.	
5	5.120	53.12	1,631.57	1,578.45	
10	3.900	106.23	2,485.60	2,379.36	
15	3.230	159.35	3,087.87	2,928.52	
30	2.170	318.70	4,149.03	3,830.33	
60	1.340	637.40	5,124.15	4,486.75	
120	0.770	1,274.79	5,888.95	4,614.16	
180	0.533	1,912.19	6,114.56	4,202.38	
360	0.328	3,824.38	7,525.62	3,701.24	
720	0.209	7,648.75	9,590.57	1,941.82	
1440	0.128	15,297.509	11,747.305	-3,550.204	

Storage - Retention

Basin - Volume

$$\text{Detention Volume Required} = 4,614 \text{ ft}^3$$

$$80\text{th percentile storm retention} = 1,735 \text{ ft}^3$$

$$\text{Discharge Volume Allowed:} = 2,879 \text{ ft}^3$$

$$\text{Volume Provided:} = \underline{4,746 \text{ ft}^3}$$

8. Orifice Sizing:**25 year storm period**

Given:

$$Q = 0.177 \text{ cubic feet/second}$$

$$2g = 64.4 \text{ ft/sec}^2 \text{ (acceleration due to gravity)}$$

$$H = 0.25 \text{ feet (3 inches) in basin from overflow to flowline outlet pipe}$$

$$Cd = 0.62 \text{ for square-edged openings}$$

$$Ao = \text{Area of orifice opening}$$

Formula:

$$Q = Cd \times Ao (2gH)^{1/2} \text{ Solving for Ao}$$

$$Ao = Q/Cd \times (2gH)^{1/2}$$

$$Ao = 0.07 \text{ square feet (orifice size)}$$

$$Ao = 10.25 \text{ square inches (orifice size)}$$

$$Ao = 3.61 \text{ inches in diameter (orifice size)}$$

Summary:**25 year storm period**

Use a 3.5" minimum diameter orifice and the outlet control rate is =

**0.31 cubic feet
per second**

(3" minimum diameter orifice per Ogden City Standards)
