

Dammeron Valley Landowners Association Architectural Guidelines

Preface

Careless development has marred much of the country's glorious scenery. To preserve the beauty of the almost 1,000 acres in Dammeron Valley, however, the owner-developer had the foresight to establish conditions of ownership and provide for a degree of ongoing control by later landowners. This was accomplished largely through two types of legally binding instruments:

Conditions, Covenants and Restrictions ("CC&Rs"):

When the owner-developer first conveyed properties, each title incorporated a set of CC&Rs. Separate CC&Rs were established for each subdivision; they are much alike, but not uniform. Each set of CC&Rs requires membership in the DVLA.

Dammeron Valley Landowners Association ("DVLA"):

The DVLA is structured by Articles of Incorporation and Bylaws. It has a Board and several committees to achieve various purposes. The DVLA's authority and responsibilities include CC&R enforcement. Subject to majority approval, the DVLA may also create additional regulations. The Architectural Guidelines and the Architectural Review Board were created by the DVLA to carry out the purpose of regulating construction within the Valley.

The DVLA Special Service District ("SSD") is a body politic within the DVLA, subordinate to Washington County. Its only present function is to provide sewer services for Pinion Hills.

In addition to restraints on construction, the above legal instruments (the CC&Rs in particular) deal with other matters, such as the levying of dues and restrictions on noise, weeds, unsightly properties and commercial ventures, to name a few. While inconveniences may occasionally result, these regulations provide significant benefits, such as the protection of land values, for all landowners.

The architectural guidelines contained herein apply to all lots contained within all Dammeron Valley Subdivisions, and are encompassed in the legal descriptions attached hereto as Exhibit "A".

The *Guidelines* and *Plan Submittal Format* reflect current DVLA standards to be observed along with other pertinent regulations. Note that County building codes focus on safe construction while the guidelines deal more with appearances and that County zoning regulations are more permissive than those for Dammeron Valley.

RUSSELL SHIRTS * WASHINGTON CO RECORDER
1995 NOV 14 15:57 PM FEE \$303.00 BY GM
FOR: ACADEMY TITLE CO

ARCHITECTURAL GUIDELINES

These guidelines largely reflect standards of appearance adopted by the DVLA and are not intended to encompass all regulations imposed by CC&Rs, Washington County or other authorities. Reference to the *Farms* includes *Farms II-A*. Reference to *Pinion Hills* includes *Phase I* and *Phase II*.

Primary Use: One site-built, single-family home and authorized accessory structures.

Style: All styles for house and accessory structures are subject to DVLA Board approval. Casual western and ranch styles are preferred. Dome and A-frame styles are not acceptable.

Minimum Size: 1400 sq. ft. or more for single-level homes, exclusive of garage and basement, in all subdivisions, except the *Farms*, which must be 1200 sq. ft. or more (1400 sq. ft. or more recommended). Two-level or split-level homes in all subdivisions must be 1000 sq. ft. or more on the lower level and 500 sq. ft. or more on the upper level.

Maximum Height: 24 ft. in *Pinion Hills* and 35 ft. in all other subdivisions for any structure, including chimneys and flag poles, but excluding ordinary rooftop antenna deemed by the DVLA Board to be at reasonable heights. No building shall exceed 2-1/2 stories in any subdivision.

Exterior Materials: The DVLA Board intends to promote thoughtful overall treatment in harmony with the surroundings; hence, all exterior materials used on the home and accessory structures are subject to Board approval before breaking ground for construction.

- **Recommended Siding:** Natural solid wood (including log), stucco, brick, adobe and natural stone.
- **Restricted Siding:** T-11 and similar siding may be used only when integrated with other acceptable materials, such as brick or stone, to enhance the overall appearance. Metal and plastic siding may not be used except for minor appearance features, such as gables and soffits.

Exterior Colors: All colors, for all structures, including roof, window frames, doors, trim and other exterior features are subject to prior approval by the DVLA Board.

- **Recommended:** Natural wood hues and native earth tones (i.e., warm, subdued colors, mainly in the brown family).
- **Not Acceptable:** White, black, cool and neutral grays, bright colors and tints of bright colors (i.e., pastels).

Roof Pitch: At least 50% of the roof area must be pitched on any building in the *Farms*, *Homesteads* or *Pinion Hills*. This is also the recommended standard for the *Ranches* and *Meadows*. The minimum pitch required in the *Farms* is 4 ft. rise to 12 ft. run. The minimum pitch required in the *Homesteads* and *Pinion Hills*, and recommended in the *Ranches* and *Meadows*, is 5 ft. rise to 12 ft. run. The maximum pitch in any subdivision is 12 ft. to 12 ft.

Garage: Required. Must be enclosed and must be built at the time of home construction and not before. Maximum accommodation, including carport (if any): 3 cars. Minimum size: 12 ft. x 20 ft.

Detached Guest Quarters: Such a dwelling must not include, or be roughed-in for a kitchen or be built or later modified in such a way as to be considered a "second dwelling" by County standards. The DVLA Board may withhold approval if it deems that the facility is oversized or portends the infringement of any regulation. Minimum contiguous floor area: 400 sq. ft.

Fences: When fronting recorded public road easements, fences, if any, must be of new wood with round posts and 2 to 4 pole or split rails, unless they are situated within a U-18 Green Belt.

Within U-18 Green Belts (i.e., land zones along highway U-18 per County plat), fences must be as described above, but with 3 or 4 dowel type pole rails only. Such fencing is required along property lines fronting U-18 and must be built within one year of lot purchase from Dammeron Corporation.

Elsewhere, fencing must be regarded as compatible by the DVLA Board. Chain link fencing is not acceptable. Wood post and rail fences, including those within U-18 Green Belts or fronting public roads, may be lined with "horse fence" or "V-mesh", if desired. In the *Ranches*, *Meadows* or *Homesteads*, except within U-18 Green

Belts, barbed wire may be used in conjunction with wood posts and rails to restrain large animals, if need, location and design are established to the satisfaction of the DVLA Board.

Setbacks: An above ground structure, other than fencing, deemed permanent by the County or DVLA Board, must not be placed within an established easement. Such a structure must be set back from all property lines a minimum of 10 ft. in the *Farms*, 15 ft. in *Pinion Hills*, or 30 ft. in the *Ranches, Meadows or Homesteads*, but no closer to recorded public road easements than 30 ft. (50 ft. recommended) in the *Ranches or Meadows*, or 50 ft. in any other subdivision. Overriding covenants prohibit structures other than fencing and underground utilities within U-18 Green Belts.

In addition, *animal shelters* for other than bona fide household pets must be *both*:

- 75 ft. or more from all dwellings and potential neighboring dwelling sites and
- 100 ft. or more from the front of a lot in the *Homesteads*, or in the rear 1/3 of a lot, excluding U-18 Green Belt portion (if any), in any other subdivision.

NOTE: *Because of lot size or configuration, some lots may not accommodate animal shelters.*

Driveways and propane tanks must be 10 ft. or more from neighboring lots. Egress is not permitted from a residential lot to U-18. An allowance of 10 ft. or more between above ground structures is recommended for clearance of fire trucks. *Before planning, lot owners should seek information from the County regarding unrecorded easements that may exist along their property lines.*

Buried Services: Lines connecting water, power, sewer, telephone and similar services must be underground. Private septic systems are not allowed in *Pinion Hills*; consequently, lot owners there should exercise caution when planning, to assure sites and designs that will enable flow into the waste system provided by the DVLA SSD.

Natural Flora: Shall not be removed without restoration or replacement with roads, buildings, landscaping and the like in a reasonably prompt manner to the satisfaction of the DVLA Board.

Earth Removal: Except as necessary during approved construction, the soil shall not be disturbed without DVLA Board authorization.

Landscaping: A cash bond is required for the planting of five 15-gallon size trees near the home. This requirement may be waived if the DVLA Board deems the lot already sufficiently wooded.

Construction Period: Temporary living quarters (e.g., mobile home, camper, etc.) on the lot are prohibited unless authorized by the County and the DVLA Board. Authorization may not exceed a period of one year and may only be issued while a permanent home is being constructed. Any project undertaken must be completed within one year after placement of temporary housing or the commencement of construction, whichever is earlier. Adequate toilet facilities must be on site during construction. Proper containers must be provided on site for construction debris. Burning of debris is subject to DVLA Fire Department approval.

The lot owner must advise construction workers of all relevant Architectural Guidelines, CC&Rs and other Dammeron Valley regulations, including those covering unnecessary noise (e.g., loud radio), speed limits and other matters of decorum.

Signs: No sign shall be displayed in public view except any or all of the following: (1) one sign, not to exceed 1 sq. ft., advertising professional service by resident; (2) one sign, not to exceed 5 sq. ft., advertising sale or rent by or for owner; (3) builder advertisements, totaling 5 sq. ft. or less, during the period of construction.

Changes And Additions that relate to any matter encompassed within the CC&Rs or Architectural Guidelines require DVLA Board approval before they are implemented.

This applies equally to any project undertaken after approval of original plans, including animal shelter and fence construction, flag pole installation, and repainting that changes exterior color, whether or not a County building permit is required. Projects not begun within one year of DVLA Board approval date must be resubmitted to the Architectural Review Board. Lot owners desiring a variance from any guideline must submit their request in writing to the DVLA Architectural Review Board.

The past absence of any guideline, issuance of any variance, inconsistency in judgment or failure to enforce does not constitute grounds for disregarding any present guideline or applicable CC&R.

FORMAT FOR SUBMITTING BUILDING PLANS

Within 30 days of fulfilling the following requisites, plans will be adjudged for compliance with CC&Rs and Architectural Guidelines and a response issued by the DVLA Board. Approval, indicated by Board signatures on the plans, must be obtained before seeking building permits from the County.

Submit Two Sets of Plans to the DVLA Architectural Review Board. (If approved, one set will be retained by the DVLA and the other returned for submittal by owner to the County Building Dept.). *Plans must include:*

Plot Plan: Scale: 1" = 50'. North indicated. Show property lines and adjacent recorded public road easements. Any established easement and any U-18 Green Belt area within lot boundaries must also be shown.

Indicate planned private roads and above ground structures and show applicable setbacks. Identify type of structure (e.g., house, garage, animal shelter, fence, propane tank, etc.). Show location of mandatory trees.

Floor Plan: Scale: 1/4" = 1'. North indicated. Required for each roofed structure. Include adjoining appurtenances, delineate kitchen appliances and provide rough plumbing and wiring information. Indicate total square footage per level for each structure. Where applicable, subtotal living and non-living areas separately. Show garage dimensions.

Elevation Drawings: Scale: 1/4" = 1'. Four views are required: front, rear (180° from the front) and opposite side views (90° and 270° from front) for each planned above ground structure. This requirement may be waived by the DVLA Board for a structure that does not exceed 12 ft. in width, length or height and for a structure that is largely two-dimensional (e.g., fence) if otherwise acceptably presented.

Key exterior elements (e.g., siding, roof, chimney, etc.) must be rendered in sufficient detail and accompanied by clear descriptions of materials, colors and textures.

Descriptions for wood must disclose form, nominal measurements, common species name, finish to be applied and other pertinent data (e.g., solid 1" x 8" ship lapped western red cedar installed rough side out with clear finish).

Color Samples: Submit with plans, accurate color samples (except clear) for the exterior features of each structure. Samples required for buildings must include all relevant features, such as roof, siding, trim, window frames, entry doors, garage doors, gable vents, soffits, gutters, etc. Furnish actual material samples on pre-finished products (e.g., brick, roofing, etc.). Samples of materials to be given a finish coat, such as wood or stucco, are helpful, but may not be essential if related material descriptions and color samples truly reflect final appearance.

Fees (As of 1995): Fees change periodically, Be sure to check with the DVLA secretary for current fees. Remit prior to, or when submitting plans, the following amounts payable to:

DAMMERON VALLEY LANDOWNERS ASSOCIATION:

- \$280.00 plan reviewal fee.
- \$100.00 cash bond, *if required* for tree plantings.

The foregoing notice is for public information and should any person having any questions concerning the above which are not addressed in this document, they should contact the Dammeron Valley Landowners Association for further clarification.

DATED this 14th day of November, 1995.

DAMMERON VALLEY LANDOWNERS
ASSOCIATION

By *Arthur Proctor*
ARTHUR PROCTOR, President
Tel: (801) 574-3764

State of Utah)

ss.

County of Washington)

On this 14th day of November, 1995, personally appeared before me, ARTHUR PROCTOR, who being by me duly sworn, did say that he is the President of the DAMMERON VALLEY LANDOWNERS ASSOCIATION, a corporation, and that said instrument was signed in behalf of said corporation by authority of its by-laws (or by a resolution of its board of directors) and said ARTHUR PROCTOR acknowledged to me that said corporation executed the same.
