2. Section 19.75.050 of the Salt Lake County Code of Ordinances, 1986, prohibits structures designed for human occupancy from being built astride an active fault. Should an active fault be discovered during construction, a special study as described in Section 19.75.060 of the Code must be performed to determine of the fault is active, and if so, the procedures set forth in Section 19.75.070 of the Code must be followed. NOTE: These active fault considerations only apply in areas within a Surface Fault Rupture area, if checked in Section 1 above.
